Proposal of website

Name of the website
 love4cocktail.com

User needs
This website is designed for people who are beginners and interested in cocktail. It's just like a mini notebook which can carry in their pockets, so it's absolutely a mobile-first website. When the girls enter any bar they can put out this website to decide what to drink or they can just communicate with the bartenders base on what they have learnt on the website. After they using the website, they will be confident to order and feel free to enjoy the cocktail world. For example, they can help order a red-color cocktail to match one's black dress according to the color site.

Content requirements
Page1
